

## PROOF OF INTERNSHIP

**Dominik Stipić** participated in a summer internship at CROZ from 7/15/2019 to 9/27/2019.

During the summer internship, the student worked on improving operations in a logistic warehouse as a member of a team focused on Data Warehouse, Data Science, and Business Intelligence technologies. The goal was to identify, calculate, compare, and suggest the best routes for pickers in the warehouse based on historic data ingested from communication devices. Generally, data projects require data cleaning and manipulation, and to achieve this, the student used technologies such as SQL, IBM DataStage, and Apache Spark.

Zagreb, 6.12.2022.
